Limited edition of 8 + 2AP

Silver & nickel-plated metal.

The pair of Folds Sconces designed with reflective hand-polished silver and nickel-plated metal is a masterpiece by GARRIDO workshop. The highly geometric sculptural aesthetic of the design is inspired by the icicle formations found in nature and offer an artist interpretation of the natural world. Hand-crafted using traditional silversmith techniques of assembling and hand-modelling, the sconces are meticulously crafted using precious metals - the workshop's signature feature. Sophisticated in their aesthetic, the Folds Sconces look marvellous as a design feature in any interior.
