The Cilindros Oval Table draws inspiration from the curved geometric forms often found in the Art-Deco architecture and is based on the earlier design of the Cilindros centrepiece. Visually arresting oval shapes of the table offer a sculptural aesthetic to the design. The striking textures developed specifically for this collection are hand-applied through the gentle hammering of the metal surfaces. Each individual piece has been treated with embossment or satin burnishing and placed to show off the skill of the workshop. The Cilindros Oval Table is a result of exceptional craftsmanship and long hours of delicate development.
