24 karat yellow gold & bronze-plated metal.

The avant-garde Cuspid Table is hand-crafted in 24 karat yellow gold and bronze-plated metal. Drawing its inspiration from Cubism, the table is executed from the multitude of rectangular facets overlapping one another. The geometric approach is seen in this design transformed and enhanced by the asymmetry, grants the Cuspid Table a multiplicity of perspectives, playfully surprising the viewer, as one single view doesn't convey a true idea of the formal richness contained within the work. The highly complex composition of the table is complimented by the wealth of colours and textures applied by hand to the numerous segments which make up the volume of the piece.
