24 karat champagne gold-plated metal with Black Aziza marble-top.

The exquisite Small Cilindros Low Table has been hand-constructed using 24 karat champagne gold-plated brass and includes a rare Black Aziza stone table-top. The stone's glistening golden veining compliments the high sheen champagne gold cylinders, which make up the body of the table. Each one of these column-shaped components different in shape and size has been hand-shaped into a perfect geometrical form and assembled with great level of precision. Majority hand-polished to a high gloss with the incrustation of some intricately hand-embossed cylinders, these jewel-like pieces wedged together create a masterpiece, unique in its execution.
